

Sucks On

Randy

Its seemes so f**king stupid to me, that this "state of freedom" can claim a year of someones life. It seems irrelevent what he feels or what he needs, put on your uniform and leave your brains behind. Cheap labour for the state, no opinions you must stay to serve someone that you hate and do exactly what the say.

Ill communication builds the ground its undispitible. And as the free wills pulls att opposite directions, they infringe a law with anotheone and they ask themselves why there credibility has gone. Ciemency and reaproval respect. how good is a soldier with the sesitivity intact, all f**king armys puts the act before the thought.in a way it aint their fault, the are just doing what there thaught. I do question their intent to defend the king and crown a piece of cloth we represent and for that its not worth to go downNOT LIKELY!!!!
