

# The Great Recession (Counteraction)

Ras Kass

It is all out war on the productive class in our society for the benefit of  
the moocher class  
The makers and the takers  
The raccoons: they're not stupid  
They intend to do it the easy way  
We make it easy for them; just like well fare recipients all across America  
Welfare will create generations of utterly irresponsible animals

Fightin' with Ras  
You Qaddafi with a knife up his ass  
Gun to the temple with blast  
Simple and fast  
Might switch up the tempo and spazz  
Either Occupy Wall Street or get you some cash  
Start wars in the Middle East and get you some gas  
And if you not the 1% then get you some class  
I mean get you some Adderall. Pay attention  
The middle class slaves pay the wage of the rich an'  
Corporations outsource to China, jobs missing  
Emeril, Rachael Ray, too many cooks in the kitchen  
Drones explode on homes to quench oil addiction  
No correcting the system, economic nepotism  
A world affliction, listen  
Kill the old, poor, and non-white the mission  
Of evangelical Christians, empty soul no conviction  
Police state, a debtors prison  
Because capitalism today is high tech lynching

700 billion bailing banks out of TARP (but, but, but, but wait it gets worse  
)  
Families evicted out of homes living under tarps (but, but, but, but wait it  
gets worse)  
CEOs with million dollar bonuses and black hearts (but, but, but, but wait i  
t gets worse)  
So I'm jumping out of water like a great white shark (but, but, but, but wai  
t it gets worse)  
Pentagon create tsunamis in Haiti so thank HARRP (but, but, but, but wait it  
gets worse)

I'm still trying to learn how to break down a blunt  
And roll it with one hand, dirty old man. Governate &  
Father a child with my maid like Conan  
Grow an afro and tan, be looking like soul man  
Kick shit like don't mess with the Zohan  
Argue with my girl over head, Michael Lohan  
Did enough blow to make abominable snowman  
Blow jobs plus no hands equals romance  
Call it the good old days... way, way back in 2007  
Before the stock market crashed and Bernie Madoff went to heaven  
I mean prison before The Great Recession  
When the country knew we had an idiot for president  
Before Oakland PD assaulted Iraq War veterans  
Currently unemployed, our money no good the currency is unemployed  
In Greece, people riot in the streets  
We so underground, I'm leviathan on beats  
Wall Street gamble your pensions and sell shares  
Ask for justice they call it class warfare

But, but, but, but wait it gets worse  
But, but, but, but wait it gets worse

700 billion bailing banks out of TARP (but, but, but, but wait it gets worse  
)  
Families evicted out of homes living under tarps (but, but, but, but wait it  
gets worse)  
CEOs with million dollar bonuses and black hearts (but, but, but, but wait i
