

## Space Blows

Ratboys

Everything is louder now  
Everything's loud

The stars are finally hitting the ground  
Take in the sound  
All over town they'll be runnin' around

Cry your feelings off the shelf  
You're gonna paralyze yourself  
Take my hand  
I'll take you back to where you started

The cries of the people in pain are not  
What they explain  
I'm not going to cry right now

Everybody's quiet now  
Takin' my hand and makin' no sound
