

Something Tells Me

Raul Malo

Something tells me you don't even know
What I'm feeling somehow doesn't show
Maybe when you're lying next to me
Maybe you are just too close to see
Remember when we said our first hello
Was that just a dream or two ago
Am I hanging to our memory
Are you missing what was meant to be
R: If I could pull you closer I whisper in your ear
All the little nothings you would ever wanna hear
Time will tell me if I'm wrong or right
I just wanna be with you to night
If I could pull you closer I whisper in your ear
All the little nothings you would ever wanna hear
Something tells me you don't even know
Something tells me you don't even know
Something tells me you don't even know
Something tells me you don't even know
