

# Everybody

Raul Midón

Picture yourself in world where there's no one else  
Nobody anywhere  
A moment ago there were voices and faces to look upon  
You can't see them anywhere

Nothing more to say and no one left to say it to anyway  
Please listen what I say

That everybody can be somebody  
And everybody is free to make a difference  
Everybody can be somebody  
And everybody is free to make a difference in this world

Now picture a world where the people all feel their worth  
Children are everywhere  
Now there is a reason for everyone's time on earth  
Wondering why you should care

Nothing more to say and only love can see us through anyway  
Please listen what I say

That everybody can be somebody  
And everybody is free to make a difference  
Everybody can be somebody  
And everybody is free to make a difference

You don't have to be a big celebrity  
To feel the power, the power in your soul, no, no  
You don't have to be a big star on MTV  
To realize that in your eyes there's a view that only you can see

Everybody can be somebody  
And everybody is free to make a difference in this world  
You can make a little difference in this world  
I can make a little difference in this world

She can make a little difference in this world  
He can make a little difference  
Everybody gonna make a little difference  
Everybody gonna make a little difference in this world

I know that, I know that, I know, know, know  
That we're gonna make, check it  
You can, I can, she can, he can  
We can, talk about, I'm talkin' 'bout

Everybody gonna make a little difference in this world  
I'm sayin' this, everybody gonna make a little  
Little difference in this world
