

# This Legend Forever

Raunchy

You live the fiction of a new bravery, your slavery  
Every time you speak her name out loud  
Will you maintain this leap of faith?  
Now that you are forced to withdraw  
I am the dead of followers  
I stand out from the crowd  
Hollow and dedeived  
I am the light through her heart chords  
My persistence is immense  
And she lays down her life  
In this ambient dark the night is young

In this world we are what they don't speak of  
We are the damned  
The soulless

Take me further  
This legend is forever  
Take me further  
Don't fall with me

She is back again like a hope divider  
She repents what she has done  
In this world we are what they don't speak of  
We are the damned  
The soulless

Take me further  
This legend is forever  
Take me further  
Don't fall with me

Her blood party is her realm of darkness  
Tired before you, bows your master  
She is restless after the bite  
Receive the kiss of death  
She is restless after the bite  
Tonight here with me

In this world we are what they don't speak of  
We are the damned  
The soulless

Take me further  
This legend is forever  
Take me further  
Don't fall with me

The scene is dead  
We are the fashion  
The new death pop romance
