

Channel Zero

Raury

See, I'm an elegant lyrical
is my spiritual
Motives are overflowing
And going beyond times
Let me get to my body
I'm hip and mentally outee
As in, me and Seattle not watching
not a factor
Love is not done by actors
Sitting down in field watching spinning wheels of a tractor
A beautiful country setting
Where every breath is a blessing
Forgetting about that everyday life
The sky's future, let future

This beautiful Aphrodite
Went dice to me when she likes it
The climax between her books
That's the beauty of cunnilingus
Green grass and golden wheat
Green raps and golden weed
Speed dash, I'm overseas
Supposedly, I'm supposed to be
One of them supernovas we
Seen outer space with them telescopes
You acting like it's whatever, though
I'm not some nigga with stethoscopes
But I came here to help, baby
for me, don't ever go
Don't ever go
Don't ever go

I've got these albatross wings, I could sleep a supply
Like, who needs the weed when you're naturally high?
I mean like, who need the plate with no piece of the pie?
I mean like, why go to work when we're all gonna die?
I mean like, why should I slave till I'm sixty years old?
I mean like, you're going broke after selling your soul, when you could...
Just be at peace with the moment
How I'm at peace with the moment
Just be at peace with the moment
How I'm at peace with the moment

And now I'm standing on the beach
Sand between my feet
I'm complete
At least I defeated my ego leaving a leader
It is freezing out in the street and complete with my inner being
Meaning I'm even, if not below what's above me
These mighty waters are making me blue
Ain't got a clue about writing using the press
Guess it may be a problem, but fuck it
I'm at my best and I'm writing from darker places
This melancholy, I'm so sorry, I'm sorry
I should've never done this and I should've never done that
Wish I could take it back
But right after, what's done is done

We just run and create a fallacy
Hoping it never happened
But it happened
Yeah, that's what happened

I've got these albatross wings, I could sleep a supply
Like, who needs the weed when you're naturally high?
I mean like, who need the plate with no piece of the pie?
I mean like, why go to work when we're all gonna die?
I mean like, why should I slave till I'm sixty years old?
I mean like, you're going broke after selling your soul, when you could...
Just be at peace with the moment
How I'm at peace with the moment
Just be at peace with the moment
How I'm at peace with the moment

Funny how the time shift
And reminisce Cadillac days, my mind shifts
Switch phase, percolate back the time missed
Reminisce all of the places I've been
I've never been the flesh but the soul inside it
Go where the love and the peace and vibe is
My ATL home too
Place I belong and I pray my tribe is
Niggas did me wrong, it's okay, I'm vibing
Only revenge is to keep surviving, and thriving
Where the heart open wide is
There's a river flow south to north like Nile did
Grown ass man is childish
Play smash bros even though I'm bout to have me a child, shit
That's like fissures wilding
Life is a fruit of a seed, take a bite like I did
The Eves' just too temptatious
The hips just too curvacious
And I won't waste God's creations
I know places, spaces, and races
On my plate, the same taste is
I made shift, the time shift, I made time
I made shit, I take shit, and make mine
Mine's a goal for mines and yours
This time, I'm sure
I'm proud to show it won't be like
Times before, I died
Then low to deep
Ocean floor to climb the mountain peaks
Time I told to find the flow to speak
If you reach the end of road then leap
If you reach the end of road then leap
Fly
