

Weird Day

Raven-Symoné

You caught me on a weird day
I don't know what else I'm gonna say
Today is just a weird day... ok

When I woke up this morning
When I feel back a sleep
In my dream I was yawning
It's such a crazy week

Something is pulling me, pulling me, pulling me, pulling me down
Then something was pushing me, pushing me, pushing me, pushing me around, uh
uh

Do you believe there's something out there
(Something out there, might be something out)
Do you believe there's something out there
(Something out there, might be something out there)
Cause I believe there's something out there
(Something out there, might be something out)
You best believe there's something out there
(Something out there, might be something out there)
Uh uh

You caught me on a weird day
I don't know what else I'm gonna say
Today is just a weird day... ok

When I woke up this morning
When I feel back a sleep
In my dream I was yawning
It's such a crazy week

Something is pulling me, pulling me, pulling me, pulling me down
Then something was pushing me, pushing me, pushing me, pushing me around, uh
uh

Do you believe there's something out there
(Something out there, might be something out)
Do you believe there's something out there
(Something out there, might be something out there)
Cause I believe there's something out there
(Something out there, might be something out)
You best believe there's something out there
(Something out there, might be something out there)
Uh uh...

Do you believe there's something out there
(Something out there, might be something out)
Do you believe there's something out there
(Something out there, might be something out there)
Cause I believe there's something out there
(Something out there, might be something out)
You best believe there's something out there
(Something out there, might be something out)
Uh uh...
