Now & Then

Ravenscode

You've had enough
Of this life
And now you say
That you're done with me
That you're done with me

I've waited now
For far too long
For you to say
You will run for me
You will run for me

Never, no never

Every now and then
That I get through to you
You're wasting all my time again
When I am there
I cannot remember
What was said to you
And how it made you mad at me
That too bad

I've played it out
For far too long
For you to say
You will run away
You will run away
So turn around
There's the door
Cause no one will
Pressure you to stay
Pressure you to stay

Never, have you been clever

Every now and then
That I get through to you
You're wasting all my time again
When I am there
And I cannot remember
What was said to you
And how it made you mad at me
That too bad

I know that in time
You will break my heart again
I know that in time
We will fall apart again

Every now and then
That I get through to you
You're wasting all my time again
When I am there
And I cannot remember
What was said to you
And how it made you mad at me

```
That too bad
...
```
