

Paradise takes a little patience  
Give it time, get up in the morning  
It's alright, never mind what we said last night  
I realize it takes communication  
Throwing knives, burning down the kitchen  
Kiss goodnight, never mind what we said last night

We get it right  
Every single day but once or twice  
Some shit gets in the way, but it's all right  
Never mind what we said last night

We always come around  
Don't take a genius to figure out  
What's wrong with slamming the door, the door, the door, the do  
or

Run a mile, now I got your attention  
Baby, smile, did I forget to mention  
It's alright? Never mind what we said last night, last night, l  
ast night  
And it can take awhile  
We been here before  
What's wrong with getting wild?  
I get it

Can't always get it right  
Every single day but once or twice  
Some shit gets in the way, but it's alright  
Never mind what we said last night

We always come around  
Don't take a genius to figure out  
What's wrong with slamming the door, the door, the door, the do  
or

We always come around  
What's love without the conversation?  
Don't take a genius to figure out  
What's love without some confrontation?  
What's wrong with slamming the door, the door, the door, the do  
or  
What's love without the conversation?  
What's love without some confrontation?
