

Courage born from despair

Rawside

So many years,
we talked about the changing of life
all the things we done
is self-destruction all the time
systems laughing
about inability for unity
scene against scene
a diversion from the real enemy!

What's happening there
might's right they close the doors
everybody knows
what else has git to happen before
enough oppression
we've seen, too much injustice for me
we're one mankind
need no leaders to be free

once more we cry for freedom
step out of my way
a million different voices
same hopes for you and me
together on this way
can't get it out of my mind
with courage born from despair
everything will be alright!

now we have payed
enough for all these wasted years
let's kick away
all sadness and the tears
fortune favours the brave
climbing up from the grave
it's in your hands
one change for one life

Despair Warning, Despair Warning
