

Let Me Take Over

Ray Charles

Baby baby let me take you over
Baby baby let me take you over

Baby, you and I know
That you've been down much too long
And there's no reason in this world
You should be hanging out messing with the one
who's doing you wrong
So if you believe in me
Girl, I know I can set you free
So it'd be hip
if you let me take you over

All I want you to do is
Let me take over
baby baby baby baby
Let me take over
baby let me take over
Let me take over
you'll be better off with me
Let me take over
I know one thing
If there's a will there's a way
And there's nothing left to say
Baby let me take you over

Darling, I heard you were feeling
Just a little back the other day
And when you called your doctor on the phone
He even said you'll be better off
if you leave that man alone
You need to clear off your mind
By just leaving him far behind
And just let me take you over

All I want you to do is
Let me take over
baby baby baby baby
Let me take over
baby let me take over
Let me take over
you'll be better off with me
Let me take over
I know one thing
If there's a will there's a way
And there's nothing left to say
Baby let me take you over

Honey, everybody knows
That you're the only one for me
So have no hesitation just come right here
And I'll be the biggest and the best lover
baby have no fear
Just put your hand in mine
And I'll be faithful all the time
If you let me take you over

All I want you to do is
Let me take over
baby baby baby baby
Let me take over
baby let me take over
Let me take over
you'll be better off with me
Let me take over
I know one thing
If there's a will there's a way
And there's nothing left to say
Baby let me take you over
