

# If You Fall

Ray Dalton

Take it back  
Now again, now again  
Take it back  
Everything that you said  
You were right, you were right by my side  
Now I know now I know I was wrong

You drive me mad, but I drown in your love forever  
Still I'll be there all the nights you can't remember  
If you fall I will be the drug that takes you higher  
If you fall I will be the drug that keeps you brighter  
If you fall (If you fall)  
If you fall I will be the drug that takes you higher  
If you fall I will be the drug that keeps you brighter  
If you fall, if you fall  
And if you do, ah  
And if you do, ah  
And if you do, ah, ah, ah, ah  
If you fall

Finally, now I know what it means to be up  
That you mean that you mean I can see every star in your eyes  
Can I still, can I still make it out?

You drive me mad, but I drown in your love forever  
Still I'll be there all the nights you can't remember  
If you fall I will be the drug that takes you higher  
If you fall I will be the drug that keeps you brighter  
If you fall I will be the drug that gets you higher  
If you fall I will be the drug that keeps you brighter  
If you fall, if you fall  
Tonight you do, ah  
Tonight you do, ah  
Tonight you do, ah, ah, ah, ah, ah (If you fall)  
If you fall, if you fall  
Tonight you do, ah  
Tonight you do, ah  
Tonight you do, ah, ah, ah, ah, ah  
If you fall
