

# We Will Get There

Ray Davies

We will get there  
If it takes us through the night  
We will get there  
Everything's gonna be alright

When we get there  
We will see the morning light  
We will be alright  
We will be alright

If it takes us through the night  
We will get there  
Promise it will be alright

When we get there  
We will see a brand new dawn  
When we get there  
Another chance to be reborn

When we get there  
We will find a better place  
We will all feel safe  
We will all feel safe

Come on baby let's take a chance  
On this rock'n roll'n world of romance  
Though danger is ahead, that's for sure  
It only makes me want you more

We will get there  
Now we've gone and made our bed  
We will get there  
Our destination lies ahead

When we get there  
Through this dark and stormy night  
The future will be bright  
We will be alright

Now I'm on this long winding trail  
Wondering where on earth did we fail  
Trying not to think how it all went wrong  
So I just keep moving on

Now I'm reaching a place I've never been before  
But it only makes me want you more

We will get there
