

# Just Like That

RAYE

We are [?]  
Sharing space, embracing time and  
Dancing as the stars are crying  
Combination of grime and violence

Bass, yeah they run along the bass  
You see these girls got time to waste  
That's why they constrict their bodies  
And mask upon their face  
You're here and you're with me  
Don't know you, you approached me  
And this night's mad

And it kicked off just like that  
I'm touching an unfamiliar hands (just like that)  
And now the music understands (just like that)  
I'm dancing through a black hole (just like that)  
And now I'm losing all control  
Just like that (that) [x4]  
Just like that (that) [x3]

I'm aware of what my body's doing  
Mind is still my body's moving  
Eyes are closed, the lights are fusing  
Got me confusing  
Lost, I'm lost in the lights  
It's half past night, but the sun's so bright  
I can't see the sky because the party's inside  
But you're here and you're with me  
Don't know you, you approached me  
And this night's mad

And it kicked off just like that  
I'm touching an unfamiliar hands (just like that)  
And now the music understands (just like that)  
I'm dancing through a black hole (just like that)  
And now I'm losing all control  
Just like that (that) [x4]  
Just like that (that) [x3]

The stars, they what ya what ya need  
I promise you'll miss me when I leave

And it kicked off just like that  
I'm touching an unfamiliar hands (just like that)  
And now the music understands (just like that)  
I'm dancing through a black hole (just like that)  
And now I'm losing all control  
Just like that (that) [x4]  
Just like that (that) [x3]

And I say goodbye, baby, just like that
