

Echo Me

Rea Garvey

They hunt you in the shadows
So run for the lights
If you don't yield your sword
You'll never survive
War wounds are bleeding
Innocence is leading
Fallen on the Deafe ears of those
Who left you to die

My brothers my keepers
Stand fast or they'll defeat us
Hold on to your ground
Dig deeper and deeper
Never retreat
Break through their barriers
Every last man, every last one a warrior

Echo me, I can't stand the silence
Their rules, their lies and their violence
They stand before you invincible
Raise your voice or you'll be invisible
Echo me I can't stand the silence
Their rules, their lies and their violence
They stand before you invincible
Raise your voice or you'll be invisible

Victory is before us
Be valiant, be true
Our children implore us
To do what we do
Patience my friend
Scabbard your sword
We may lose this battle
But we can't lose this war

Echo me, I can't stand the silence
Their rules, their lies and their violence
They stand before you invincible
Raise your voice or you'll be invisible

No cross will carry you
No armies will rally you
No seas will divide
No words that you say can be denied
No cross will carry you
No armies will rally you
No seas will divide
No words that you say can be denied

Echo me, I can't stand the silence
Their rules, their lies and their violence
They stand before you invincible
Raise your voice or you'll be invisible
Echo me, I can't stand the silence
Their rules, their lies and their violence
They stand before you invincible
Raise your voice or you'll be invisible
