# Do It Again

**Real Life**

For the first time that I see
Helping hands are there to guide me
Love will last forever until then
I want your touch beside me
Until tomorrow comes to find me
All I wanted don't stop do it again

Do it again do it again
Now that we are more than friends
Do it again
I get excited I get untwisted
I get revival with your kisses

Tonight will be forever until then
I'm in a warm glove with a cold fist
In the name of love I can't resist
All I wanted don't stop do it again

Do it again do it again
Now that we are more than friends
Do it again

Do it again do it again
Now that we are more than friends
Do it again
