

Where's God?

Real Life

Breathe
If I could only breathe
You're suffocating me
I've lost my empathy
The truth
Is lying in the dust
It's kicking up a fuss
Along with my disgust

Where's God while this is happening?
Where's God while this is happening?
Where's God while this is happening?
Where's God while this is happening?

Faith
Is all but laid to waste
It's gone without a trace
To find a human race

Where's God while this is happening?
Where's God while this is happening?
Where's God while this is happening?
Where's God while this is happening?

Where's God while this is happening?
Where's God while this is happening?
Where's God while this is happening?
Where's God while this is happening?
