

# Only You

RealestK

(Only you, only you, only you...)

And I'm coming back to you cause she don't understand  
She don't wanna love, she's one other mess  
She been moving steps like she wanna dance  
Baby, I don't wanna be just friends

Can he treat you like a man?  
Can he hold your hands and dance?  
Baby, does he fake pretend?  
Is he your number one fan?  
Can he love like me?  
Trust like me?  
Fall like me?  
Wait and see  
What he claims to be  
You and me, to the end, and to the eternity

And I'm drinkin' champagne and I'm pouring right it up in this cup  
Baby, you got some problems, can you show me up?  
And I always been the one to always show you love  
And I climbed up all these mountains to put you above  
Told me I was crazy for having a vision  
Said I was the greatest, but you would never go listen  
Yeah, I know I'm not the greatest but I can't be if I stay  
Be inconsistent, if I stay makin' decisions that  
Would take me to levels that I thought I couldn't reach  
Maybe if I make some music with a message and a speech  
Maybe I can be an idol, maybe I can go and teach, aye  
Raise all these kids whose heads are stuck inside the streets

I told you, if you feel the pain  
Call me when you're feeling everything today  
You don't want to show, you don't want to go  
Everything you know  
Is this how it is? It is?

She said that she wanna leave, I'm posting where the time at  
Every time she talk to me, I'm asking are you mad yet?  
Love it when you touch it, while I'm pushing down your spine back  
To stickin' how I'm moving when you callin', I decline that

And I'm coming back to you cause she don't understand  
She don't wanna love, she's one other mess  
She been moving steps like she wanna dance  
Baby, I don't wanna be just friends

I put my trust in you, you put your trust in me  
I should've known that you would end up leaving me  
I cut too many tears for you, way too many times on you  
Tell me all the things you do, but been through many fights for you  
Remember all the times that we had  
Baby, every time I met your laugh  
Every time you fightin', I fight back  
You know that I had your back  
She knows, when she goes  
Call my phone, let me know

Can you put your hand in mine?

Can you call me one more time?  
Say that you are mine
