

Good Day

Rebelution

Today is gonna be a good day
And I wouldn't want it any other way
I've got my number one lover right beside me
And she holds the key to my safe
Well, there are six vibrations to be made
In a pattern that I only designate
Well, she sings to me
When I need her to be my everything
She's my everything
It's gonna be a good day

No other beauty can purr like her
She picks me up when I need her most
And good company when I'm alone

Today is special in its own way
Because I never really know what's in store
I've got a reason to believe and a reason to depend on a good time with good company
Well, there are six vibrations to be made
In a pattern that I only designate
Well, she sings to me
When I need her to be my everything
She's my everything
It's gonna be a good day

No other beauty can purr like her
She picks me up when I need her most
And good company when I'm alone
It's gonna be a good day

No other beauty can purr like her
She picks me up when I need her most
And good company when I'm alone
No one does it quite like you
I share with you my deepest truths
Beauty that I can't explain
Two can only play this game
I hear you call out my name
And you remind me
It's gonna be a good day

No other beauty can purr like her
She picks me up when I need her most
And good company when I'm alone
It's gonna be a good day

No other beauty can purr like her
She picks me up when I need her most
And good company when I'm alone
