

Slower

Recover

She lies awake, 'cause she can't sleep next to me
I think she's looking for a way out
I can hear you calling, calling
I will come while you sing over me, over me

Condition's growing worse
Why don't you answer

We are going slower
Going slower, going slower
the world will never know about us
Know about us

When you wake up it won't be next to me
I spend my days in the sky
I can feel you calling, calling
I will come while you sing over me, over me

Condition's growing worse
Why don't you answer

We are going slower
Going slower, going slower
The world will never know about us
Know about us

Condition's growing worse
Why don't you answer

We are going slower
Going slower, going slower
The world will never know about us
Know about us
