

Supernova

Red Shahan

I got news for anybody that wants to go and settle down
Put out all your burning fires
Wake up early everyday and don't stay out late at night
A shoot in star might change your mind

Here comes a super nova heading my way
Here comes a super nova covered in flames
And she's my
And she's my
Supernova flame

The problem with stars is when they blow up everything turns to
black
But what a feeling to feel alive
If even for a short time
Give me the fire give me the fire

Here comes a super nova heading my way
Here comes a super nova covered in flames
And she's my
And she's my
Supernova flame

And she's my
And she's my
Supernova flame

Supernova flame
