Gravity

Red Wanting Blue

Explore your unknown
Into the dark we roll
Float upon your landscape
A million miles from home

Rocket ready to crash and burn for you
Rocket ready to crash and burn for you

I would be a spaceman
I would be a spaceman
I would be a spaceman for you

You eclipse me with your face
I give up the ground to match your grace
And I would vandalize outer space
Remake constellations to spell our names
Like when we used to carve our names in the bark
Or write upon the windshield fog in the car
Sign autographs with sparklers in the dark
We'll make graffiti out of stars

Rocket ready to crash and burn for you
Rocket ready to crash and burn for you

I would be a spaceman
I would be a spaceman
I would be a spaceman for you

If it wasn't for gravity, we'd be gone
If it wasn't for gravity, we'd be gone
If it wasn't for gravity, we'd be gone for good

I would be a spaceman
I would be a spaceman
I would be a spaceman for you
Oh, I would be a spaceman
I would be a spaceman
I would be a spaceman for you
