

## Wave Goodbye

Red Wanting Blue

Did you need a change of pace to counteract the tide?  
That rocks your weary walls on the inside  
Did you need to rearrange your alibis?  
The truth is not faking anything but...  
The disbelief...  
In your own bitter ending  
And the disbelief...  
Forgiveness of mending  
And the disbelief...  
You're breaking not bending  
And the disbelief...  
Suspending

Chorus:

You raise up your hands  
Looking for the light  
Searching for all your happy endings  
Waving your hands  
Trembling in the light  
You gather up all your happy endings  
Did you think you were the case that steps outside

Of the box that locks your fear inside  
Did you think that second place would kill your pride?  
The truth is not shaking anything but...  
The disbelief...  
In your own bitter ending  
And the disbelief...  
Suspending

Don't you want to see tomorrow?

Repeat Chorus

Wave goodbye

Hearts apart, in pieces and parts  
For instance, long distance is not a good start  
But we can't help that we're in love  
We never took the time  
To step outside this life  
You know I'm right  
Take a deep breath  
And hold it inside  
I'll gather up all your happy endings  
Repeat Chorus  
Wave goodbye  
If you go...  
Wave goodbye
