Red

Over time you lost the line
The glowing box, a self decline
Your silent anger so loud behind
The keys to it all, a minus sign

Say what chu will, what chu will
Anything... for a kill, for a kill
Run 'em down til you wear the crown
Say what chu will, what chu will
Anything... for the thrill of a kill
Beat 'em down til they're underground

You bring the gun, bleed with a knife
The darkest sky is your paradise
Faceless fame on a heap you reign
You leave the hate but you still play the saint
Saint!

Righteous so, how you cleave
Quick, proxy poison to the feed
Just a fake beast ready set for the siege
Burn with the blue til you face me

Say what chu will, what chu will
Anything... for a kill, for a kill
Run 'em down til you wear the crown
Say what chu will, what chu will
Anything... for the thrill of a kill

You bring the gun and bleed with a knife
The darkest sky is your paradise
Faceless fame on a heap you reign
You leave the hate but you still play the saint

No human alliance
Violence never silence
No human alliance
Violence never silence

No human alliance
Violence never silence
No human alliance
Violence never silence

Toss my heart and hope I die
Stab that needle in my eye
Toss my heart and hope I die
Stab that needle in my eye

You bring the gun and bleed with a knife
The darkest sky is your paradise
Faceless fame on a heap you reign
You leave the hate but you still play the saint
Saint!
