

# Outlier

Reed Deming

She's just an outlier from a small little town  
Everyone's trapped there and no one gets out  
And all of her friends get drunk and high  
'Cause that's what you do  
It's easy to see through a world  
That doesn't see you

While the world keeps on changing  
She stays the same  
And they call her crazy  
But she knows her name

He's just an outlier under big city lights  
He's caught in a jungle that could eat him alive  
And all of the vampires bleed him dry  
'Cause that's what they do  
It's easy to see through a world that doesn't see you

While the world keeps on changing  
He stays the same  
And they call him crazy  
But he knows his name  
No matter what happens  
He'll find a place  
Somewhere he can run to  
Where he won't have to change, whoa

And he will sing songs for people like us  
And not be afraid to love what we love  
And we'll thank the places that we came from  
For what we've become

We'll let the world keep on changing  
But we'll stay the same  
And they'll call us crazy  
But we know our names  
No matter what happens  
We'll find a place  
Somewhere we can run to  
Where we won't have to change, change, change, change

Where we don't have to change  
We won't change
