

Satellites

Reed Deming

We're safe here tonight
Like stars in the sky
The world's asleep around us
The starlights still surround us
As we kiss tonight
I'll hold your hands in mine
We've made it through this darkened days
And nothing else can break us
Cuz we've try so hard

We're waking up the satellites
We know the stars that shines so bright
With all of these surrounds you
All of these surrounds you
You're still be mine

Just go
There's nothing left to say
As they look into the window
While everyone is sleeping in their beds.
We'll go
Where no one else can find
All the spaces they were hiding from
Yeah, you're still safe beside me
And we try so hard

We're waking up the satellites
We know the stars that shines so bright
With all of these surrounds you
All of these surrounds you
You're still be mine

Just wake me from sleeping
And I'll touch your soft skin
And pretend that its all starting over

We're waking up the satellites
We know the stars that shines so bright
With all of these surrounds you
All of these surrounds you
You're still be mine

We're waking up the satellites
We know the stars that shines so bright
With all of these surrounds you
All of these surrounds you
You're still be mine
Oohh
