

The Infamous Left

Refused

Rise
Rise up
Damned of the earth
Damned of the earth

Rise up damned of the earth
Scorned and tattered, no self worth
The tenet died an academic death
A generation from the blood and the sweat
Rise up, put your papers down
Hear the boots march right outside
You theorize safe in your seat
But the struggle never left the streets

So clever clever with it's opinions
Do you remember how we used to fight
It wants tenure not opposition

It has the watches - it has the time
It's time to strike
Right now

Rise up damned of the earth
Keep the promise of a brand new birth
For everyone that fought before
For every song sung about this war
Rise up, all you wretched souls
We want it all and deserve it all
Rise up, make the powers pay
For every wound that bled the way

You're clever clever but it's still in you
And I remember how we used to fight
Fuck a defeatist disposition

We have the watches - we have the time
And we need to strike

What's left of the promise that we once made
What's left that could chase the vultures away

Rise up right now
