

What's Wrong

Reggie and the Full Effect

The first day that I saw your face
I knew you never could replace
What you mean to me
You said it was the first time
But now it's just the worst time
For you and me

So long, I finally figured out what was wrong
So long, I finally figured out what was wrong
Was wrong
Was wrong
Was wrong

The first day that I met you there
I never thought you'd really care
About me
So now that I'm the old one
You said you'd see a new one
Instead of me

So long, I finally figured out what was wrong
So long, I finally figured out what was wrong
Was wrong
Was wrong

So let me dry your eye
And I'll say things you've never heard before
You know that I will try
Wait and see
You know

So long, I finally figured out what was wrong
So long, I finally figured out what was wrong
So long, I finally figured out what was wrong
