

# My Friend Robot

Regurgitator

I've got the greatest friend, he's a robot  
He is my man and he's megawatt  
He doesn't pretend, never lies  
Never cheats, never steals from me

I trust nobody else with my secrets  
I can depend on his sequence  
Logical patterns I trust  
In his hard drive, relax, I can unwind and

I got a friend and he's a robot man  
You know I got a friend, he's a computer man

I know there is no human so techno  
There is nobody so day glo  
Constant companion  
Who knows all the action  
Can calculate fractions

And he is zero's and one's  
And I know this  
He is not flesh and he can't kiss  
But who needs humans  
When humans get angry  
And humans get ugly

And I got a friend and he's a robot man  
You know I got a friend, he's a computer man  
I got a friend and he's a robot man  
You know I got a friend, he's a computer man

I got the greatest friend, he's a robot  
He's always thinking just non stop  
Computing language  
While making a sandwich  
Converting the average

And he is always such fun  
And he's number one  
Taking the time and he can run  
Right through the night  
And he never sleeps  
And he never lies down

I got a friend and he's a robot man  
You know I got a friend, he's a computer man  
I got a friend and he's a robot man  
You know I got a friend, he's a computer man
