

Virtual Life

Regurgitator

I've got everything
That i could ever need
It's under lock and key
Just survive all alone me and my screens

I am living a virtual life
We've got everything here inside... come on (2x)
I don't need a car
Why should i leave?
When human contact
Is replaced by my tv screen...

I am living a virtual life
We've got everything here inside... come on (2x)

I am living a virtual life
We've got everything here inside... come on (2x)
