

I Might Explode

Rehasher

It's not adding up, I'm at the end
All the faith is gone again
I don't have a clue, I can't comprehend
So I'm asking

Show me what I'm doing wrong
I've been defeated for too long
I don't like to cheat or
Take the easy road
But if something doesn't change
I might explode

'Cause it's made to last
It's no heart attack
And there's no more turning back
Is what's best for you left in the past?
I'm just asking

Show me what I'm doing wrong
Its been depressing for too long

I don't like to cheat or
Take the easy road
But if something doesn't change
I might explode
I might explode

No bail out or a helping hand
Just break out and believe again
Explode

Show me what I'm doing wrong
Its been depressing for too long
I don't like to cheat or
Take the easy road
But if something doesn't change
I might explode
I might explode

No bail out or a helping hand
Just break out and believe again
Explode
Well, I might explode
