

# Light of the World

ReinXeed

How many wonders can you show to me beyond the madness all around

The moon will guide my way

The way back home to you

Everyone is waiting for their time

Listen to voices in the blowing wind

see the sunrise open up a dawn for you

Happiness can tell, sorrows is a spell

Someday everyone can see

There's something we can do

See me I shine from the light of the world

I fell, I wish that everyone can see that

A world without freedom isn't real

Tell me now I know the secrets lying deep within

The sunlight holds the truth

Darkness comes my way, I welcome everyday

With a smile of happiness cause

One day we will see, we will see

They can hold us down forever

But never take away our dreams

In this night we unite together we can make

We can make our dreams come true
