

Had a vision of you on your knees
Talking softly, whispering things to Jesus
You used to fight me when my talk was cheap
You never stopped trying to see the bad in everything

I'm in deep
I turn around to watch you fall all over me
I'm at the edge of the sink
Watching everything come out clean

Let me down easy, Junie please
Talking softly of the way things used to be
You didn't like me when my hands were clean
I'll never stop trying to see the bad in you and me

I'm in deep
Was I supposed to let you walk all over me?
Wring me out 'til I bleed
Until everything comes out clean
Until everything comes out clean

Do something different with all that free time
You're just wasting your mind, you're wasting your mind
And nothing came easy like you thought that it might
Just do something right, just do anything right
Just do something right, just do anything right
Oh, do something different with all that free time
You're wasting your mind, you're wasting your mind
And nothing came easy like you thought that it might
Just do something right, just do anything right
Just do something right, just do anything right
