

Sirens

REMMI

All those sirens flying down the highway
All those people standing in the street
All the blood was draining from our bodies
No one feels a fucking thing

So string me down and kiss my neck
Tonight is all that we have left
Tomorrow comes and my body burns
My body burns
Lying next to her, I'm next to her
My body burns
For you

Shadows moving underneath the doorway
Hearts are racing, this could be the end
And maybe we hit the floor together
'Cause I don't wanna live without this

So string me down and kiss my neck
Tonight is all that we have left
Tomorrow comes and my body burns
My body burns
Lying next to her, I'm next to her
My body burns
For you

My body burns, my body burns
My body burns, my body burns

So string me down and kiss my neck
Tonight is all that we have left
Tomorrow comes and my body burns
My body burns
Lying next to her, I'm next to her
My body burns
For you
