

Speaking softly in my
Is it yet that time of year
Brother I know they're all wrong
Bothered see you in the fall

It can blind you if you look right at it
Right behind you I know that you said it
Watch your back because if you don't they'll get it from you

Instinct all you need to feel
Jesus better click your heels
Away take all of what's real
There's none, nothing left to steal

It can blind you if you look right at it
Right behind you I know that you said it
Watch your back because if you don't they'll get it from you

If it works out don't tell them that I said it
If it doesn't I'll let them know I meant it

It can blind you if you look right at it
Right behind you I know that you said it
Watch your back because if you don't they'll get it from you
