

# Experimental Skin

Jane Remover

Allez, allez  
It's better if you can't hear me  
Lips engraved on a comet  
I think that I been falling for you, I know  
I'd give you all the stars along a tightrope  
The world around me forms a black hole, I  
Sometimes, I still don't think I have a soul, I  
Words won't translate through holograms  
It engulfs and renders me motionless  
Think God became a part of you  
Who cares? I'm just a robot to you  
Everything in life just falls apart, I know  
You don't even know what you do to me  
Think God became a part of you  
Who cares? I'm just a robot to you  
Everything in life just falls apart, I know  
You don't even know what you do to me  
You don't even know what you do to m- (Go)  
You don't even know what you do to m-

Me and them, so different  
But I'm a shapeshifter  
I've been working on it all season  
(The next round will determine the outcome)  
I'm glued to a head bending keys  
I'm a new kind of bitch off kilter  
Drugs get me on some freak shit (Go)  
And I'm nothing when I need it  
But I been the same bitch you went missing for  
I got a new song you can remix  
(Determine the outcome)  
Let's meet up and fuck up the weekend  
Poisoned as fuck yeah I'm a shapeshifter  
It's the same eyes see through this pain that we smoke yeah  
Come touch it, see no evil

Come touch it, see no evil  
Come touch it, see no evil  
Come touch it, see no evil  
Come touch it, see no evil  
Come touch it, see no evil  
Come touch it, see no evil  
Come touch it, see no evil  
C-C-Come touch it, see no evil

I taste all the past, present, future too  
No such thing as bitter, this ain't nothin' new  
You walk the ground I kiss, find me at the pad  
Fuck nowhere fast  
Everywhere been nothing new  
Bitches don't know what to call it, I'm like 3 and 0  
Experimental skin, bitch I let the hot wind blow  
Side with the skin on, and again, and again, and on  
Turn you away from your friends cause I turn you on

I think that I been falling for you, I know  
I'd give you all the stars along a tightrope

Think God became a part of you  
Who cares? I'm just a robot to you  
Everything in life just falls apart, I know  
You don't even know what you do to me  
I think that I've been falling for you, I know  
You don't even know what you do to me  
(Can you feel that?)  
I can't hear you over the band  
I wanna sin, blow the city up  
I can't hear you over the band  
I wanna sin, blow the city up  
I wanna sin, blow the city up  
I wanna sin, blow the city up  
I wanna sin, blow the city up  
I wanna sin, blow the city u-  
I wanna sin, blow the city up  
I wanna sin, blow the city up  
I wanna sin, blow the city u- (J-J-J-J-)

Think God became a part of you  
Who cares? I'm just a robot to you  
Everything in life just falls apart, I know  
You don't even know what you do to me  
Think God became a part of you  
Who cares? I'm just a robot to you  
Everything in life just falls apart, I know  
You don't even know what you do to me  
You don't even know what you do to me
