

## eyes off the wheel, i'm a star

Jane Remover

When the power goes out, I grab some matches  
And I know that I'm not deserving of the real truth  
You're talking how you're a star and it makes me blush  
When my face turns blue, I know-

I can't keep living like this  
I already tried it, even time can't fix what I did  
All I need's a night, bitch  
It's not too late to change  
And if you're too scared to change  
Then keep living in confinement  
Who cares if you don't like it?

I can't keep living like this, like this  
Like this, I like this  
I like this, like this  
Like this, I like this  
I like this, like this  
Like this, I like this  
I like this, I like this

When the power goes out, I grab some matches  
And I know that I'm not deserving of the real truth  
You're talking how you're a star and it-

I can't keep living like this  
I already tried it, even time can't fix what I did  
All I need's a night, bitch  
It's not too late to change  
And if you're too scared-

I wasted so much time under the covers  
And all the airways were closed up  
And I hate knowing I can never go back  
(The last thing I can do is wake up)
