

Empty cup
Mixing drinks and messing 'round with simple drugs
Feel my self I am living life the maximum
Now tell me did you feel this good when you were young?
(Bet not)
We crush the ice
Kiss me slow and touch me there just how I like
I can see the future everything is right
Now the blue I felt it like it change its sight

But maybe it was something I said
Maybe I am in over my head
But the mood just change so suddenly
And you decide to up that lead
But if you close the door
And leave me on the floor
This love can be no more

Tell me truth
Show me what I have to prove
All these boys run after you
Up, down through these avenues
Night time just looks out for me
We fight so damn casually
It feels like a tragedy
And I feel bad 'cause naturally

It was probably something I said

No, it wasn't
Driving in the spot with the spot 'cause the husband, I'm still tryin
g to do my best but I keep coming up with nothing you can tell me wha
t I'm doing wrong so I can stop my runnin' and I'm late for my mistak
es so maybe we can keep on loving we got issues but who doesn't?, all
this fightin', all this cussin', no more sense with this concussion,
say you leave em, but this bluffin' I can see it in your eyes
There's no need for surprise

Maybe it was something I said
Maybe I am in over my head
But the mood just change so suddenly
And you decide to up that lead

Maybe it was something I said
Baby, girl I don't regret
But the mood just change so suddenly
And you decide to up that lead
And if you close the door
And leave me on the floor
This love can be no more
