

Shining Star

Rend Collective

Shining Star, come and guide our hearts
Shining Star, come and guide our hearts
Shining Star, come and guide our hearts
Shining Star, come and guide our hearts

The angels watched in mystery
As You took off Your glory
Instead You put on human skin
To reconcile all things again

You stepped into the darkest night
To blaze the skies with heaven's sign
That we all matter, we are loved
That Your heart beat's strong for us

What a picture of love

You are magnificent
You are magnificent
You are my rescuer

You light the darkest night
You light the darkest night
You are the shining star

The angels watched in mystery
As You bore all our misery
The hands that crafted worlds and stars
Chose the pain of human scars

You came to die the lowest death
To show the human soul its worth
And as You burst through the darkness
You raised the dead in all of us

What a portrait of grace

You are magnificent
You are magnificent
You are my rescuer

You light the darkest night
You light the darkest night
You are the shining star

You are magnificent
You are magnificent
You are my rescuer

You light the darkest night
You light the darkest night
You are the shining star

Shining Star, come and guide our hearts
Shining Star, come and guide our hearts
Shining Star, come and guide our hearts
Shining Star, come and guide our hearts
