

Fire In the Sky

Rev Theory

Don't fuck around, tell me, what do you want?
'Cause it's written on your face
There's no more trust, there's no more love
Only [?] and decay

I'm done with feeling so sick and tired
When we all have hell to pay

Oh, there's fire in the sky
Can we leave this place forever?
Escape our own demise
The time is now or never

Deluded mind, I know who you are
By the sickening display
So chemically, you're number one
You got a bullet in your head

I'm too far gone to come back
Like you were never there

Oh, there's fire in the sky
Can we leave this place forever?
Escape our own demise
The time is now or never

What the hell are we fighting for?
Can we all just come back down to the earth
Yeah, the enemy right at the door
So closing the point of no return

Could this be the end
Lost in a world of sin and division

There's fire in the sky
Can we leave this place forever?

Oh, there's fire in the sky
Can we leave this place forever?
Escape our own demise
The time is now or never

There's fire in the sky
There's fire in the sky
Can we leave this place forever?
Forever
