

# Over It All

Rev Theory

So long ago, it won't go away  
It's caught in my head, I feel we're going nowhere

So long ago, it's all I can bear  
I'm thinking 'bout the memories, how you weren't there

You're taking me down, with the weight that you carry  
Over it all, you finally come to look up and over it all

You're taking me down, in the hope that you can't see  
Over it all, you finally come to look up and over it all

So long ago, I promised myself  
I take you away from all these memories now

So long ago, I carried it all  
The burdens of the bitter hands that you couldn't hold

You're taking me down, with the way that you carry  
Over it all, you finally come to look up and over it all

You're taking me down, with the way that you can't see  
Over it all, you finally come to look up and over it all

I feel we're coming closer, looking over it all  
I feel we're coming closer, but still we're going nowhere

Cold like a winters day, it goes right through me  
Cold like a winters day

(You're taking me) with the way that you carry  
Over it all, you finally come to look up and over it all

You're taking me down, in the hope that you can't see  
Over it all, you finally come to look up and over it all

Over it all (you're taking me down)  
So long ago, so long ago
