

Bottles Of Lightning

Revis

Here come the lightning sparks
That light up your face in the dark
My God it's almost like
You're right here by my side
Hanging on the words I try to say
Watch another season starting to change

But maybe in the meantime you will go
To that place between the light and the shadows
Cause you know I'll be there
And there you will find me
Blissfully blinded by bottles of lightning

This is my favorite part
All the way back at the start
Catching bolts of light
To feel what it's like when it strikes
Hanging on the words I try to say
Watch another season starting to change

But maybe in the meantime you will go
To that place between the light and the shadows
Cause you know I'll be there
And there you will find me
Blissfully blinded by bottles of lightning

And maybe in the meantime I will show
In that place within your eyes where I used to go
And I'll find you there and you'll be reminded
Blissfully blinded by bottles of lightning

But maybe in the meantime you will go
To that place between the light and the shadows
Cause you know I'll be there
And there you will find me
Blissfully blinded by bottles of lightning

And maybe in the meantime I will show
In that place within your eyes where I used to go
And I'll find you there and you'll be reminded
Blissfully blinded by bottles of lightning
