

Toxin

Rezz

You're lovely, but looks can kill
You're a septic cloud, but I'm breathing still
It's not right, you take it all
Still I listen, and return your call
Oh

Toxin, got my temperature rising
Our love finally taking its toll
It's incredible how quickly I lost me
And I just can't take you no more

You're lowly, you drag me down
Just burned up ash left on the ground
No vision, you've made me blind
Smoke signals burn into my eyes
Oh

Toxin, got my temperature rising
Our love finally taking its toll
It's incredible how quickly I lost me
And I just can't take you no more

Na na na, na na na na
Nananana, na na na na
