

Satellite

Rhodes

Tell me love, tell me from the start
How we came so far, then we fell in to the dark
You're not alone if you let me be the one you wrap your arms around

You're a satellite and you lead me back to home
You keep me right, better than you know
And I'm not alone 'cause I feel you around me always looking down

Lonely is the night time
Lonely in the night
Lonely is the night time
Lonely in the night

Satellite, satellite lead me home
Satellite, satellite

Tell me your, tell me your story don't leave me out
I've been away from home but I'll come back now
If you let me be the one you wrap your arms around

Lonely is the night time
Lonely in the night
Lonely is the night time
Lonely in the night

Satellite, satellite lead me home
Satellite, satellite

'Cause I feel you around me always
I feel you around me always
I feel you around me always looking down
Around me always
Believe me I fear the dark days
The feeling surrounds me always
But I hear you calling my name, oh calling my name
I feel you around me always
I feel you around me always
I feel you around me always looking down
Around me always

Satellite, satellite lead me home
Satellite, satellite lead me home
