

# Somebody

Rhodes

It's late, though I'm lonely during night  
I wanna see somebody, somebody  
Shimmers in the blacks of my reflections  
I wanna see somebody

I wanna take you higher, higher  
Than we could ever go  
Than you ever could've known

But I don't know who you are  
I don't know who you are  
I am not the same anymore  
Maybe I've gone too far

Stars, will I see what you see?  
When I leave my body, my body  
My head fell to look down at my hand  
I wanna be somebody

I wanna take you higher, higher  
Than we could ever go  
Than you ever could've known

But I don't know who you are  
I don't know who you are  
I am not the same anymore  
Maybe we've gone too far

But I don't know who you are  
I don't know who you are  
I am not the same anymore  
Maybe we've gone too far

But I need to find an easy way to give  
But I need to find an easy way to give in my heart

Well I need to find an easy way to live, in my mind

But I don't know who you are  
I don't know who you are  
I am not the same anymore  
Maybe we've gone too far

But I don't know who you are  
I don't know who you are  
I am not the same anymore  
Maybe we've gone too far

But I need to find an easy way to live  
But I need to find an easy way to give in my heart  
But I need to find an easy way to live  
But I need to find an easy way to give in my heart
