

Under The Sun

Rhys Lewis

I remember every second
Like it was yesterday
You said you couldn't see a future
I wish I felt the same
'Cause I've tried leavin' you behind
And I've tried gettin' on with my life

I've been to New York City, seen the Brooklyn Bridge
Felt the waves in Rio crash on my skin
I got busy livin' to forget your love
But you're still my favorite thing under the sun
You're still my favorite thing under the sun

I sometimes wonder what you're thinkin'
If there's a part of you
That's hopin' we'll get back together
That you still miss me too

'Cause I've tried leavin' us behind
And I've tried gettin' on with my life

I've been to New York City, seen the Brooklyn Bridge
Felt the waves in Rio crash on my skin
I got busy livin' to forget your love
But you're still my favorite thing under the sun
You're still my favorite thing under the sun

I've been to New York City, seen the Brooklyn Bridge
Felt the waves in Rio crash on my skin
Yeah, I got busy livin' to forget your love
But you're still my favorite thing under the sun
You're still my favorite thing under the sun
You're still my favorite thing under the sun
