

Find Another Reason

Richard Ashcroft

If all of this is energy
A never-ending symphony
Echoing in time
Then baby
In your eyes I wanna stay
Reflecting what I want to say
Now I see my crimes

If all it is a losing streak
A life just full of misery
I think I understand
But baby
Within you I can feel the dream
A never-ending frequency
Oh, the sound's sublime

And in time
You might find another reason
Find another reason to live
I'm on your side
So let's find another reason
Find another reason to live

You're walking out Gethsemane
A wondrous morning this shall be
Don't you feel divine?
And baby
The miracles that come so fast
And you are passing every test
With the magic in your mind

And in time
We may find another reason
Find another reason to live
I'm on your side
So let's find another reason
Find another reason to live

If all of it is clear to me
The crystal waters running free
The mountains of your soul
Baby
The words are flowing out of me
An endless page of song to sing
Something to delight
Honey

If all of this is energy
A never-ending frequency
Echoing in time
Baby
The cave is where I need to be
And I can come out again
Whenever I like
Baby
