

Ketamine

Richard Edwards

Went to Chicago, had some ketamine
Surveyed the city from my limousine
Baby, I have loved you since I was seventeen
And I need you to know
Lord, when I left you I got blown apart
I have returned to build you Noah's ark
And save you from the wicked work on which I have embarked
Since you were last in my heart

I say what I wanna say
I do what I wanna do
And right now, baby blue
I wanna spend my time with you
I wanna spend my time with you

My love, I feel it deep within my gut
And I can swear I saw our minds melt together
Feet turn to feathers
And mountains beneath us
Yes, ma'am, I get the feeling that I am
And I can swear I saw our pasts sewn together
Heads full of feathers
And nothing between us

I say what I wanna say
I do what I wanna do
And right now, baby blue
I wanna spend my time with
And I go where I wanna go
My mind is a rodeo
And that's why, baby blue
I wanna spend my time with you
I wanna spend my time with you

Love, this time I'm hoping it's enough
I wanna know you till the whole hog expires
The world goes to fire
And there's nothing left but ocean
