

Time Is

Richard Hawley

Where have we been to and what did you see?
Don't really know why but it doesn't bother me

Time is on your side right now
But time can change

What is it that you are wanting
And what are you hiding?
Do you know where it is you're going to
And hoping to find there?

Time is on your side right now
But time will change

As you are now
I once was
As I am now
You will be

Time is on your side right now
But time can change
Time is on your side right now
But time will change

To my storm bred sons
And my hurricane daughter
Who were born from sand
And to sand we will return
And wind and white water

Cos time is on your side right now
Time can change
Time is on your side right now
But time will change

(Time) yes it will change
(Time) time will change
(Time) time will change
(Time) time will change
